

ELECTRICAL INSTALLATION – ORDER

CONNECTED LOADS (please complete in full):

- a) **Stand lighting:** Spotlights _____ piece á _____ watt
- b) **Machinery and equipment** to be operated:
 230 volt: _____ á _____ watt
 _____ á _____ watt
 400 volt: _____ à _____ kW
 _____ á _____ kW
- c) **BASIC CONNECTION 230 V/1800 W** (the installation of a basic electrical connection is included in the stand rental)
 230 V/1800 watt, socket outlet with earthing contact included, but please still **mark with a cross**: π **yes**
PLEASE NOTE: NO OVERNIGHT POWER!

We can additionally order:

QUANTITY	DESIGNATION	Prices in EURO
	CONNECTION and CHECKING OF: OWN DISTRIBUTION UNIT up to 3 kW	€38,--
	OWN DISTRIBUTION UNIT up to 6 kW	€80,--
	OWN DISTRIBUTION UNIT up to 20 kW	€142,--
	STANDARD CONNECTION 230 V up to 3 kW with loaned distribution unit, fault current circuit breaker, automatic cutout, socket outlet, incoming line incl. assembly and disassembly	€83,--
	STANDARD CONNECTION 230 V/400 V up to 6 kW with loaned distribution unit, fault current circuit breaker, automatic cutout, socket outlets 230/400V, incoming line and meter incl. assembly and disassembly	€216,--
	STANDARD CONNECTION 230 V/400 V up to 20 kW with loaned distribution unit, fault current breaker, automatic cutout, socket outlets 230/400V, incoming line and meter	€325,--
	ADDITIONAL SOCKET OUTLET 230 V/400 V	€23,-
	LOANED SPOTLIGHT 100 W, incl. cable	€30,--
	LOANED FLOODLIGHT 300 W, incl. cable	€43,50
	LOANED REFRIGERATOR, 140 l	€55,--

The prices are for the duration of the event incl. once-only assembly and disassembly work, excl. 20 % VAT.

Conditions for the use of electricity (extract from the exhibition regulations):

For light and power an electricity network with a voltage of 3 x 400/230 V is available. It is **absolutely** essential that notification of the required total connected load be given in good time as otherwise the supply of electrical energy to the desired extent cannot be guaranteed. It is expressly pointed out that the installation of meters is required if the duration of electricity use is not exactly known. The exhibitor is liable for the loaned meters up to disassembly after the close of the exhibition. The use of officially calibrated own meters is permitted. If meters are not used, a flat-rate charge will be applied. In this case the exhibitor will be obliged to allow the appointed bodies of the exhibition management to record all the electricity consumers in their actual location on the exhibition stand.

For electrical installations, **after the daily closure of the exhibition** and after the end of the exhibition event all electricity circuits on the exhibition stands (with the exception of **registered** special consumers, e.g. refrigerators and freezers) must be **de-energised** by switching off the circuit breakers or these will be switched off by the exhibition electrician without prior notice.

Subject to a general change, the **electricity consumption price** currently amounts to **net € 0.52 per kWh** (plus 20 % VAT), **at least** however **net € 20.00**. We acknowledge and accept the stated conditions.
