PRODUKTINFORMATIONEN / PRODUCT INFORMATION

CONNECTED LOAD (mandatory):

- a) **Stand/Booth lighting:**
- Spot light, _____ pcs. á _____ Watt
- Spot light, _____ pcs. á _____ Watt
- Spot light, _____ pcs. á _____ Watt

b) Machines and equipment to be used:

- 230 Volt: _____ pcs. _____ á _____ Watt
- _____ pcs. _____ á _____ Watt
- 400 Volt: _____ pcs. _____ á _____ Watt
- _____ pcs. _____ á _____ Watt

c) **BASIC CONNECTION 230 V/1800 W** (The exhibition stand rent includes the installation of a basic electrical connection of 230 V/1800 Watt with SCHUKO socket. Please tick nevertheless: yes _____)

PLEASE NOTE: NO OFF-PEAK ELECTRICITY

Power procurement conditions:

A power supply system of 3 x 400/230 V is available for light and power. Make sure to inform us of the required total connection load in time, as it will otherwise not be possible to guarantee the supply of electrical energy as requested. Please note in particular that meters must be installed, if the duration of power consumption cannot be precisely determined. The exhibitor shall be liable for rental meters until they are removed after the end of the trade show. The use of officially calibrated property meters is permitted. If no meters are used, a flat rate will be charged, in which case the exhibitor shall allow the person appointed by Kärntner Messen Management to record on site all power consumers located at the exhibition stand.

All circuits at the exhibition stands (with the exception of registered special consumers, such as refrigerators and freezers) must be disconnected from the mains at the end of each exhibition day and at the end of the trade show. To do so, switch off the circuit; or they will be switched off by the exhibition electrician without special notice.

Subject to a general change, the power consumption price is currently € 0.65 per kWh net (plus 20 % VAT), but at least € 20 net.

We take note of the conditions stated.
